Instructions: Every Local 353 member who has performed duties within an area containing asbestos that has been dealt with, handled, disturbed or removed shall have his/her full period of exposure to same recorded and reported on this form. See reserve side of this form for the legend and category of asbestos exposures.
Categories of Asbestos Exposure

A. The removal of a false ceiling or part thereof to obtain access to a work area where a significant quantity of friable material containing asbestos is likely to be lying on the surface of the false ceiling.

B. The removal of friable material containing asbestos during the repair, alteration, maintenance or demolition of a building, aircraft, ship, locomotive, railway car, or vehicle or any machinery or equipment, or part thereof.

C. The enclosure of friable material containing asbestos.

D. The application of tape, a sealant or other covering to pipe or boiler insulation containing asbestos.

E. The spray application of a sealant to friable material containing asbestos.

F. The cleaning or removal of air-handling equipment including rigid ducting in a building that has sprayed fireproofing containing asbestos.

G. The repair, alteration, or demolition of a kiln, metallurgical furnace or similar device made in a part of refractory materials containing asbestos.

H. The use of power tools not equipped with a dust collection device equipped with HEPA filter to grind, cut or abrade a manufactured product containing asbestos including vinyl or acoustic tiles, gaskets, packings, friction products or asbestos cement products.

I. The repair, alteration or demolition of any building or part thereof in which asbestos is or was used in the manufacture of a product, unless the asbestos was cleaned up and removed before the Regulations came into effect.
