

Join us for an informative one-night program – *Level I: Introduction to Lighting Types/Technologies* hosted by **Standard Pro**.

This is the first of a **four-level series** of classes. Level 1 includes an introductory overview that identifies main traditional lighting components and their functions (lamps/ballasts), and how we differentiate between incandescent, fluorescent, and HID. It will also map out the transition from traditional lamps into LED equivalent options, and how traditional and newer technology plays in today’s market. This class will establish the base fundamental knowledge that will lead to *Level 2: Under the Technology/Specifications Behind Lighting*.

**There is a limit of 20 participants for this seminar, so don’t delay and register quickly.**

**Seminar A:** Monday November 13, 2017  
**Seminar Time:** 6:30pm – 9:30pm  
**Location:** Toronto Training Centre, 1377 Lawrence Ave. E., East Building

**Seminar B:** Tuesday November 14, 2017  
**Seminar Time:** 6:30pm – 9:30pm  
**Location:** Mississauga Training Centre, 3185 Orlando Dr., TR 203

**STANDARD PRO SEMINAR**  
**Level I: Introduction to Lighting Types/Technologies**

**A:** Monday November 13       **B:** Tuesday November 14, 2017  
Toronto Training Centre      Mississauga Training Centre
