One-Night Seminar **Thomas&Betts** A Member of the ABB Group

As promised, we are offering a one-night seminar at the Mississauga Training Centre from *Thomas&Betts* on **PVC Coated Rigid Conduit Bending & Threading Practices**. This seminar is a hands-on, interactive evening including information on hazardous location boxes and fittings. This seminar is limited to 20 participants. Don't delay and complete the attached registration form and forward in to the administration office.

Two-Night Certificate Seminar by StandardPro **STANDARD**

We have been working with *StandardPro* for the several months to develop a two-night certificate seminar on **Introduction of Lighting Types**. Participants will develop a better understanding of different lighting types and technical specifications related to lighting – specifically related to light quality, colour and spectral distribution. The seminar will delve into colour rendition, LM79, 80 reports; L70, L90 hours rating; an introduction to park/roadway lighting; and, wireless controls/wired controls. At the conclusion of the seminar a certificate will be issued from the *Standard Training Academy*. This seminar will be offered at both the Toronto and Mississauga training centres.

Judith Nyman Secondary School Tour and Workshop

In mid-March we hosted Judith Nyman's Secondary School's Grade 11/12 electrical class for a one day orientation and hands-on workshop at the Mississauga training centre. Brother Matt Ganz teaches the electrical program at Judith Nyman and for several years has brought his classes to Local 353's training centre each semester. The students have the opportunity to hone their skills by completing several projects while under the supervision of Sister Sharon Watt and Brother Mike Rogge. This field trip gives the students a chance to see firsthand the investments that Local 353 puts into training, the value of lifelong learning and the benefits of becoming an electrician within the IBEW. It is a good feeling knowing that we are able to provide these opportunities to the younger generation and hopefully encourage them to pursue a career as an electrician.

WHMIS Training

A reminder to our members that WHMIS training is available for those members who are out of work and require updated training. **Members who are working or listed as not-at-trade are not eligible to take this update training.** Training is available every Tuesday at the Toronto Training Centre at 8:30am, and every Thursday at the Mississauga Training Centre at 8:30am.

"The great aim of education is not knowledge but action". Herbert Spencer

Yours in Training,

Susan Boorman
Director of Education and Training

IBEW 353 EDUCATION AND TRAINING
LEARN MORE.
BE MORE.

Join us for an informative one-night information seminar on **PVC Coated Rigid Conduit Bending & Threading Practices**, hosted by *Thomas&Betts*. Thomas & Betts, a member of the ABB Group of companies, is a global leader in the design, manufacture and marketing of essential components used to manage the connection, distribution, transmission and reliability of electrical power in industrial, construction and utility applications.

This seminar is a hands-on, interactive evening including information on hazardous location boxes and fittings. **There is a limit of 20 participants for this seminar, so don't delay and register quickly.**

Seminar Date: Tuesday June 13, 2017
Seminar Time: 6:30pm – 9:30pm
Location: Mississauga Training Centre, 3185 Orlando Drive, Mississauga
