

Categories of Asbestos Exposure

- A. The removal of a false ceiling or part thereof to obtain access to a work area where a significant quantity of friable material containing asbestos is likely to be lying on the surface of the false ceiling.
- B. The removal of friable material containing asbestos during the repair, alteration, maintenance or demolition of a building, aircraft, ship, locomotive, railway car, or vehicle or any machinery or equipment, or part thereof.
- C. The enclosure of friable material containing asbestos.
- D. The application of tape, a sealant or other covering to pipe or boiler insulation containing asbestos.
- E. The spray application of a sealant to friable material containing asbestos.
- F. The cleaning or removal of air-handling equipment including rigid ducting in a building that has sprayed fireproofing containing asbestos.
- G.. The repair, alteration, or demolition of a kiln, metallurgical furnace or similar device made in a part of refractory materials containing asbestos.
- H. The use of power tools not equipped with a dust collection device equipped with HEPA filter to grind, cut or abrade a manufactured product containing asbestos including vinyl or acoustic tiles, gaskets, packings, friction products or asbestos cement products.
- I. The repair, alteration or demolition of any building or part thereof in which asbestos is or was used in the manufacture of a product, unless the asbestos was cleaned up and removed before the Regulations came into effect.
